Kevin Stockard

Misleading website

When googling az districts a link to the district locator comes up which is still showing the old districts maps. There is no indication that this site is for archival purposes. The main website indicates that its for archival purposes but why keep misinformation posted. This is bound to confuse people and needs to be taken down immediately. Move it to an archive section of the main page if its really needed but the link below needs to point to the site with the correct information.

<https://azredistricting.org/districtlocator/>

Thanks
